Ai-VM111S

Freescale™ QorIQ™ T4 6U VME SBC

Embedded Computing
without Compromise

The Ai-VM111S is Aitech's latest generation VME PowerPC SBC, based on Freescale's new T4 Series QorIQ System-on-Chip (SoC) multi-core, multi-thread processors, with on-chip high speed L1 and L2 caches, and numerous integrated bus, memory, and I/O controllers.

The wide variety of on-board I/O and large memory resources, including on-board mass storage, in combination with the powerful SOC processor, make the Ai-VM111S the right VME SBC for many applications, right out of the box. The two industry standard mezzanine slots (one PMC and one XMC) provide flexibility and expandability, along with the availability, convenience, and cost benefits of COTS.
